Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if an when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscript that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A OS2, Canada (Tel: 613-993-9251; Fax:613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 82

Abadi RV → Broomhead DS
Abarbanel HDI → Falcke M
Ademoglu A → Isoglu-Alkaç Ü
Aihara K → Luk WK
Aihara K → Suzuki H
Aihara T, Tsukada M, Matsuda H: Two dynamic processes for the induction of long-term potentiation in hippocampal CA1 neurons 189
Akiyama M → Makino Y
Akoev GN → Bedrov YA
Arbib MA → Spoelstra J

Backhaus W → Becker K
Bartsch H → Stetter M
Basar-Eroglu C → Isoglu-Alkaç Ü
Becker K, Backhaus W: A physiological model of dark-adapted and light-adapted photoreceptors of the honeybee 153
Bedrov YA, Dick OE, Nozdrachev AD, Akoev GN: Method for constructing the boundary of the bursting oscillations region in the neuron model 493
Beek PJ → Post AA
Beer RD → Calvitti A
Broderick MP, Pavis B, Newell KM: Assessment of the adiabatic transformability hypothesis in a ball-bouncing task 433
Broomhead DS, Clement RA, Muldoon MR, Whittle JP, Scallan C, Abadi RV: Modelling of congenital nystagmus waveforms produced by saccadic system abnormalities 391
Burwick T → Wiemer J

Calvitti A, Beer RD: Analysis of a distributed model of leg coordination 197
Celsis P → Pastor J
Clement RA → Broomhead DS
Clifford CWG, Langley K: Recursive implementations of temporal filters for image motion computation 383
Corbacho F → Huerta R

Daffertshofer A → Post AA
Dangelmayr G → Schwarz J
Demiralp T → Isoglu-Alkaç Ü
Démonet J-F → Pastor J
Dengler R → Staude G
Dick OE → Bedrov YA
Doi S → Fukai H
Doyon B → Pastor J
Dufossé M → Frolov AA

Elson RC → Falcke M

Falcke M, Huerta R, Rabinovich MI, Abarbanel HDI, Elson RC, Selverston AI: Modeling observed chaotic oscillations in bursting neurons: the role of calcium dynamics and IP_3 517
Fasse ED, Hogan N, Kay BA, Mussa-Ivaldi FA: Haptic interaction with virtual objects. Spatial perception and motor control 69
Fell J, Mann K, Röschke J, Gopinathan MS: Nonlinear analysis of continuous ECG during sleep I. Reconstruction 477
Fell J, Mann K, Röschke J, Gopinathan MS: Nonlinear analysis of continuous ECG during sleep II. Dynamical measures 485
Feng C → Wu Z
Frolov AA, Dufossé M, Řízek S, Kaladjian A: On the possibility of linear modelling the human arm neuromuscular apparatus 499
Fromherz P → Prinz AA
Fukai H, Doi S, Nomura T, Sato S: Hopf bifurcations in multiple-parameter space of the Hodgkin-Huxley equations I. Global organization of bistable periodic solutions 215
Fukai H, Nomura T, Doi S, Sato S: Hopf bifurcations in multiple-parameter space of the Hodgkin-Huxley equations II. Singularity theoretic approach and highly degenerate bifurcations 223
Fukunaga T → Ikegawa S

Gong Z → Wu Z
Gopinathan MS → Fell J
Grishin A → Stapley P
Guo A → Wu Z
Gutkin BS, Smith CE: Conditions for noise reduction and stable encoding of spatial structure by cortical neural networks 469

Hatze H: The inverse dynamics problem of neuromuscular control 133
Hellwig B: A quantitative analysis of the local connectivity between pyramidal neurons in layers 2/3 of the rat visual cortex 111
Hogan N → Fasse ED
Huerta R → Falcke M
Huerta R, Sánchez-Montañés MA, Corbacho F, Sigüenza JA: A Central pattern generator to control a pyloric-based system 85

Ichikawa K → Okamoto H
Ikegawa S, Shinohara M, Fukunaga T, Zbilut JP, Webber Jr CL: Nonlinear time-course of lumbar muscle fatigue using recurrence quantifications 373
Ikeura R → Nakazawa N
Inooka H → Nakazawa N
Isoglu-Alkaç Ü, Basar-Eroglu C, Ademoglu A, Demiralp T, Miener M, Stadler M: Alpha activity decreases during the perception of Necker cube reversals: an application of wavelet transform 313
Isurugi Y → Kashima T

Joublin F → Wiemer J

Kaladjian A → Frolov AA
Kashima T, Isurugi Y, Shima M: Analysis of a muscular control system in human movements 123
Kay BA → Fasse ED
Keidel M → Tirsch WS
Korenberg M, Solomon JE, Regelson ME: Parallel cascade identification as a means for automatically classifying protein sequences into structure/function groups 15

Lafon M → Pastor J
Langley K → Clifford CWG
Luk WK, Aihara K: Synchronization and senstivity enhancement of the Hodgkin-Huxley neurons due to inhibitory inputs 455

Makino Y, Akiyama M, Yano M: Emergent mechanisms in multiple pattern generation of the lobster pyloric network 443
Mann K → Fell J
Matsuda H → Aihara T
Meinhardt G: Detection of compound spatial patterns: further evidence for different channel interactions 269
Meyer-Bäse A → Meyer-Bäse U
Meyer-Bäse U, Meyer-Bäse A, Scheich H: An interspike interval method for computing phase locking from neural firing 283
Miener M → Isoglu-Alkaç Ü
Mortensen U, Nachtigall C: Visual channels, Hebbian assemblies and the effect of Hebb's rule 401
Muldoon MR → Broomhead DS
Murakami J → Suzuki H
Mussa-Ivaldi FA → Fasse ED

Nachtigall C → Mortensen U
Nakazawa N, Ikeura R, Inooka H: Characteristics of human fingertips in the shearing direction 207
Newell KM → Broderick MP
Nomura T → Fukai H
Nozdrachev AD → Bedrov YA

Obermayer K → Piepenbrock C
Obermayer K → Stetter M
Okamoto H, Ichikawa K: Switching characteristics of a model for biochemical-reaction networks describing autophosphorylation versus dephosphorylation of Ca^{2+}/calmodulin-dependent protein kinase II 35

Papaxanthis C → Stapley P
Pastor J, Lafon M, Travé-Massuyès L, Démonet J-F, Doyon B, Celsis P: Information processing in large-scale cerebral networks: the causal connectivity approach 49
Pavis B → Broderick MP
Perz S → Tirsch WS

6 475HI XL 2000
11/00 31249-200 NIJLE

Peterka RJ: Postural control model interpretation of stabilogram diffusion analysis 335
Piepenbrock C, Obermayer K: The effect of intracortical competition on the formation of topographic maps in models of Hebbian learning 345
Post AA, Daffertshofer A, Beek PJ: Principal components in three-ball cascade juggling 143
Pozzo T → Stapley P
Prinz AA, Fromherz P: Electrical synapses by guided growth of cultured neurons from the snail *Lymnaea stagnails* L1

Rabbitt RD: Directional coding of three-dimensional movements by the vestibular semicircular canals 355
Rabinovich MI → Falcke M
Regelson ME → Korenberg M
Řízek S → Frolov AA
Röschke J → Fell J

Sánchez-Montañés MA → Huerta R
Sato N, Yano M: A model of binocular stereopsis including a global consistency constraint 357
Sato S → Fukai H
Scallan C → Broomhead DS
Scheich H → Meyer-Bäse U
Scherb H → Tirsch WS
Schwarz J, Sieck A, Dangelmayr G, Stevens A: Mode dynamics of interacting neural populations by bi-orthogonal spectral decomposition 231
Schweighofer N → Spoelstra J
Scutt T → Webb B
Selverston AI → Falcke M
Shima M → Kashima T
Shimozawa T → Suzuki H
Shinohara M → Ikegawa S
Sieck A → Schwarz J
Sigüenza JA → Huerta R
Smith CE → Gutkin BS
Solomon JE → Korenberg M
Sommer G → Tirsch WS
Spengler F → Wiemer J
Spoelstra J, Schweighofer N, Arbib MA: Cerebellar learning of accurate predictive control for fast-reaching movements 321
Stadler M → Isoglu-Alkaç Ü
Stagge P → Wiemer J
Stapley P, Pozzo T, Grishin A, Papaxanthis C: Investigating centre of mass stabilisation as the goal of posture and movement coordination during human whole body reaching 161
Staude G, Dengler R, Wolf W: The discontinuous nature of motor execution. I. A model concept for single-muscle multiple-task coordination 23
Stetter M, Bartsch H, Obermayer K: A mean-field model for orientation tuning, contrast saturation, and contextual effects in the primary visual cortex 291
Stevens A → Schwarz J
Suzuki H, Aihara K, Murakami J, Shimozawa T: Analysis of neural spike trains with interspike interval reconstruction 305

Taylor JG, Taylor NR: Analysis of recurrent cortico-basal ganglia-thalamic loops for working memory 415
Taylor NR → Taylor JG
Tirsch WS, Keidel M, Perz S, Scherb H, Sommer G: Inverse covariation of spectral density and correlation dimension in cyclic EEG dynamics of the human brain 1
Travé-Massuyès L → Pastor J
Tsukada M → Aihara T

von Seelen W → Wiemer J

Wacquant S → Wiemer J
Webb B, Scutt T: A simple latency-dependent spiking-neuton model of cricket phonotaxis 245
Webber Jr CL → Ikegawa S
Whittle JP → Broomhead DS
Wiemer J, Burwick T, von Seelen W: Self-organizing maps for visual feature representation based on natural binocular stimuli 97
Wiemer J, Spengler F, Joublin F, Stagge P, Wacquant S: Learning cortical topography from spatiotemporal stimuli 173
Wolf W → Staude G
Wu Z, Gong Z, Feng C, Guo A: An emergent mechanism of selective visual attention in *Drosophila* 61

Yano M → Makino Y
Yano M → Sato N

Zbilut JP → Ikegawa S
